

Automated Workforce Dimensions Testing: Build vs. Buy

You know testing Workforce Dimensions isn't an option, it's a must.

You also know the value that automated testing can bring to your team. But, if you think building homegrown automated testing is the most cost effective way to keep pace with constant Workforce Dimensions releases...think again.

TestAssure keeps your team ahead of Kronos updates so they're not bogged down with constant maintenance that eat up time and resources.

Built by the **ONLY** Workforce Dimensions Automated Testing Partner.

Our cloud-based service is maintained in lock-step with Kronos Technology Partner Workforce Dimensions. Every time Kronos issues a release, we automatically update TestAssure, allowing your team to always be ready to test system upgrades. No other testing solution can do that.

Why TestAssure-built automations?

Better — Pre-built and maintenance free

Faster — Deliver automated testing today

Cheaper — No automations to develop and maintain

“TestAssure’s out of the box service allows my project team to test Workforce Dimensions immediately, giving me the ability to focus my limited resources on other important deliverables.”

*Product Manager
Fortune 20 Retailer*

Build at your own risk:

BUILD AN AUTOMATED TESTING SOLUTION

Extensive Kronos technical experience needed

High cost to develop framework and infrastructure

Requires resources to maintain automations

Can take 12-18 months to deliver

High risk of failure

USE TESTASSURE

No technical expertise or coding required

No CI/CD framework to setup or maintain

TestAssure is constantly kept in lock step with Kronos

Deliver automated testing today

Built on 20+ years workforce testing experience

Don't spend time & resources building a custom automated testing framework. Test Workforce Dimensions today!
